MyAccess™ features

TAKE REMOTE CONTROL
OF YOUR SECURITY SYSTEM

Home Security Management is Now Only a Txt Msg Away

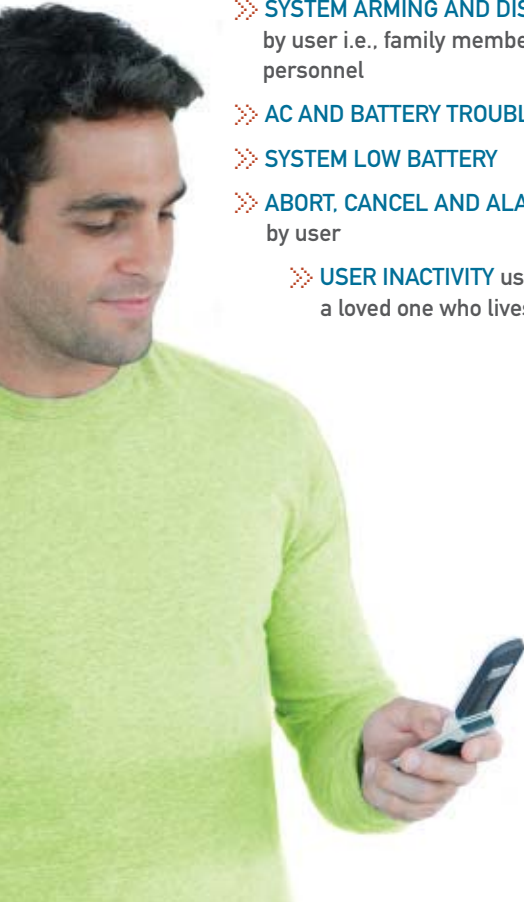

Manage your home security system from anywhere with your cell phone and stay in touch 24-7 whether at home or away on business or vacation.

With the MyAccess™ Features, you can control your alarm system from your cell phone via text commands, and automatically receive status messages and alarms directly to your cell phone via email or text message. Use any model of cell phone, with no special application required!

Check System Status

Now you can receive alarm status messages on your cell phone and select up to three cell phone destinations.

- » **ALARMS** by zone, e.g., kitchen or back door
- » **TROUBLE** by zone, e.g., kitchen or back door
- » **SYSTEM ARMING AND DISARMING** by user i.e., family member, system personnel
- » **AC AND BATTERY TROUBLE/RESTORAL**
- » **SYSTEM LOW BATTERY**
- » **ABORT, CANCEL AND ALARM VERIFIED** by user
 - » **USER INACTIVITY** used to monitor a loved one who lives alone

Control Your System

With MyAccess Features, you can control your alarm system with your cell phone by sending simple text messages.**

- » **ARM/DISARM** turn all areas of your alarm system on or off
- » **SLEEP** arm the perimeter and selected interior sensors of your home
- » **HOME** arm just the perimeter of your home when you want to stay protected while remaining inside your home
- » **AWAY** turn all areas of your system on when you leave your house
- » **CANCEL** turn off an alarm in the event it was mistakenly triggered
- » **STATUS** ask the system to reply with its current status, e.g., ARMED, READY, ALARM and others.

Each command received by your system is acknowledged back to you via a return text message so you know that your command was received.

And if that's not cool enough, home automation and other home systems and appliances can be integrated with your alarm system. Simply text ON or OFF followed by the name of the device or system you want to control, e.g., ON SPRINKLERS, ON LIGHTS. Isn't it wonderful living in the age of technology—take advantage of it with MyAccess features!

* Up to 48 characters.

** Requires purchase of the cellular features from your alarm dealer to activate this option.
